Esri
Portland, OR || Redlands, CA

To Whom it May Concern,

I admire the track record that Esri has in regards to setting high standards for quality GIS software for users. I believe the Junior C++ Software Developer position can work towards such a mission.

EXPERIENCE. I am an exemplary candidate for your **Junior C++ Software Developer** position as I take the importance of providing responsive and quality software to heart. In my scholastic career, I have spearheaded numerous projects that deliver upon these goals. Examples of my projects that include mapping functionalities include:

- ▷ **Voyager Index** — a quality of life application to help world travelers find their next home.
- ▷ **RemoveMyWaste** — a map application for hazardous waste removal.

WORK SKILLS. Through a combination of courses and extracurricular pursuits, I have a solid experience with major software development foundations. My abilities in planing, executing, and maintaining web, mobile, and database projects using a wide range of languages and frameworks can greatly serve your business pursuits.

The above experiences and my attached resume provide an overview of my qualifications for this position. Following a review of my accomplishments, I would greatly appreciate the opportunity to discuss a software developer position at Esri.

Sincerely,
Liam Beckman
