Dear So and so,

I admire the track record that So and so company has in regards to quality software and dedicated service to users. The junior software internship can work towards such a mission, as well as learn much from your company.

EXPERINCE. I am an excellent candidate for a **Junior Software Intern** as I take the spirit of open source and free softare to heart. In my scholastic career, I have created several successful projects that integrate with a personal software development suite.

WORK SKILLS. Through a combination of courses and extracurricular pursits, I have a solid experience with major software development foundations. My abilities in planing, executing, and maintaining projects **using C, C++, Python, Java, and JavaScript** can greatly serve your business pursuits.

The above experiences and my attached resume provide an overview of my qualifications for this position. Following a review of my accomplishments, I would greatly appreciate the opportunity to discuss a software internship at So and so.

Sincerely,

Liam Beckman
